

Product Release Notice

KINGSTAR 4.5.5

General Availability Release Date

July 31, 2026

Product Overview

KINGSTAR 4.5.5 is the latest version of IntervalZero's all-software, "plug-and-play" PC-based Machine Automation platform for IoT and Industry 4.0. This release expands hardware compatibility with support for the latest Intel® processors, integrates RTX64 4.5.5, and resolves key issues related to device connectivity and the Configuration Tool, improving overall system compatibility, reliability, and stability.

New Features & Updates

- Added support for these Intel® processors:
 - Panther Lake (Core Ultra Series 3)
 - Arrow Lake (Core Ultra Series 2)
 - Amston Lake Refresh (Atom 7th Gen x7809C)
- Added support for Balluff BNI00L3. [KSE-5989]
- Updated the KINGSTAR Runtime to incorporate RTX64 4.5.5 into KINGSTAR 4.5.5.

Resolved Issues

- Resolved an issue where the Configuration Tool could not display the Surpass Z2200 device when MDP was disabled using the ESI Import Tool. [KSE-5922]
- Resolved an issue where KINGSTAR 4.5.4 could not connect to Beckhoff EL6900 and Beckhoff EL6910. [KSE-5981]

Availability

KINGSTAR 4.5.5 is available starting July 31, 2026 through partners and by contacting sales at sales@intervalzero.com.

We look forward to any comments and feedback. If you have any recommendations, or wish to suggest any product enhancements, please contact Product Management at: productmanagement@intervalzero.com.
